

SERVICE

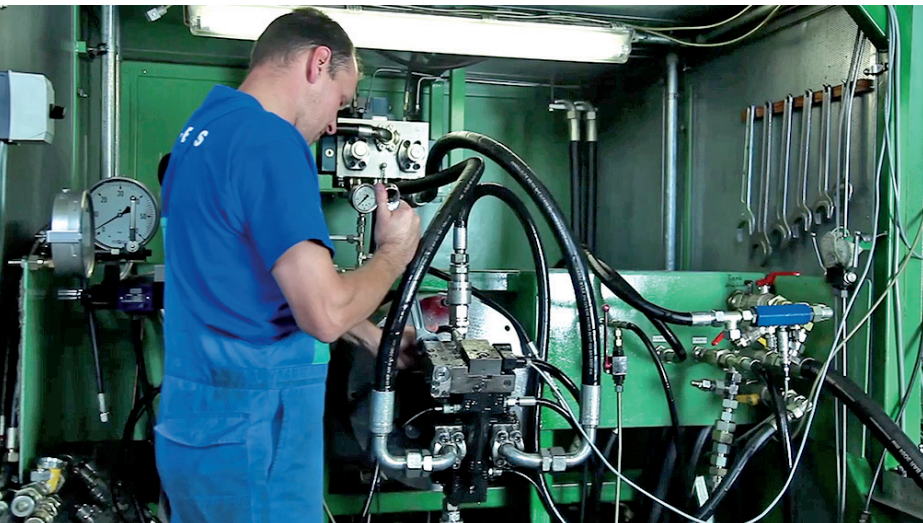

We accompany your machine its whole life long, regardless of its name or rating plate. Our maintenance and repair services are brand-independent. Our Service is ideally equipped and adapted to whatever product you want to have serviced or repaired. We can also show you alternatives to components that are no longer available because the availability of your machine is one of our prime concerns.

We come to you

Our service team is excellently equipped. We come to you and provide help on site. We therefore support you actively to ensure the productivity and thus the cost efficiency of your machines and systems.

You come to us

Our modern and excellently equipped repair centre at our headquarters in Neu-Ulm, Bavaria has all the necessary tools, especially when the necessary repairs are major.

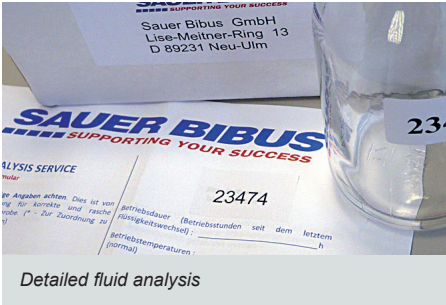

Test benches for open and closed circuit

For all brands

We have already promised you brand-independent service. This is an important part of our service portfolio and gives us a special position in the market.

Our spare parts store provides rapid assistance

We invest in a richly stocked spare parts store for your safety. This helps you in an emergency and us to deliver quickly. Our wide assortment of brand components guarantees that your machine can always be supplied with the correct genuine parts.

Headquarters of SAUER BIBUS in Neu-Ulm, Germany

SAUER BIBUS – Your competent partner for hydraulic drive technology

Welcome!

SAUER BIBUS was founded as a trading company for brand name hydraulic components. With strong partners, power of innovation and technical competence, the young company soon became a much demanded system solver for a large number of customers in many different sectors of industry.

Welcome to the full service house

For us, full service means a comprehensive range of services. Consulting, available parts, customised solutions and support which will accompany your product throughout its service life.

Based on this understanding, SAUER BIBUS has become an efficient and, above all, competent partner for hydraulic drive technology in the course of the company's history.

Dedicated to quality

The consistent concentration on trade with high quality products has made our company a high performance partner for our customers. With the step towards a system provider, SAUER BIBUS also transposed this company philosophy onto the development and production of complete sub-assemblies and units.

The future obliges

We are glad to pass on our knowledge. We want our customers to benefit from our know-how and, in close co-operation with us, to look for and find new ways and realise the answer in the form of intelligent solutions and products.

With our „HyCube“ information centre we have created a source of information for intelligent solutions and trailblazing technologies.

SYSTEMS & MODULES

Complete solutions from SAUER BIBUS are sophisticated system solutions that are tailor-made to meet our customers' requirements. Our developers constantly place the emphasis on greatest possible efficiency. With our know-how in combining efficient components with own developments, we help our customers to be able to offer innovative and efficient products.

Reliability through experience

We always have one priority where both stationary systems or complex system solutions for mobile hydraulic systems are concerned: Reliability.

The experience of many years of intensive development activities, accompanied by continuous qualification of our staff have made us what we are today: a highly qualified specialist in a wide field of hydraulics.

Sparring partner for development

Are you on the look-out for a single solution or developing a series product which has to fulfil special features? Then we are the partner that you are looking for.

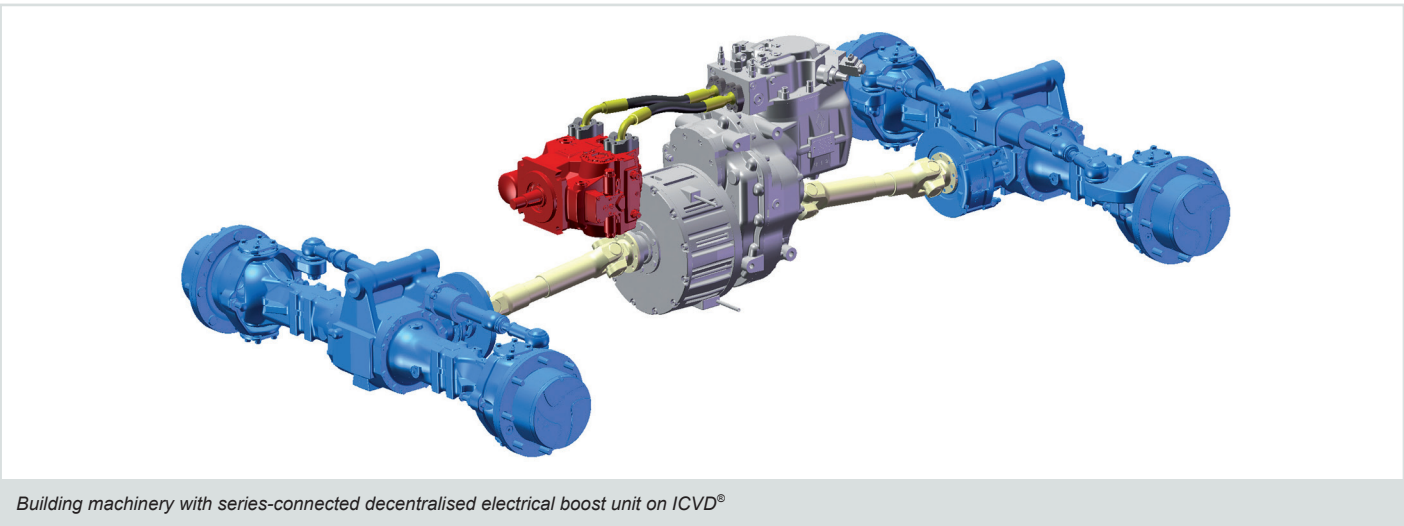

But before we start work, we will study your project intensively. Our aim is always to find the best technology with the greatest possible efficiency for you.

Our strength is our flexibility

We are able to adapt quickly to our customers' special requirements. This makes us strong and especially fast. Our corporate structure is designed to develop individual solutions unbureaucratically. Our flexibility therefore becomes our customers' success factor.

Brand components are our key to success. We therefore have only the best in our portfolio. Whether you need hydraulic pumps, motors or special valves, we provide you with the most suitable brand product.

Our consulting is your success

Do you need certain hydraulic components? We are the right address if you do. Our specialists will give you competent technical advice and help you choose the required products. Consulting is an important part of our customer support. Because the right choice will later be decisive for the functionality, reliability and market success of your product.

And another important argument: You will be surprised how fast we can deliver. We have the majority of the standard components on stores stock and can dispatch these the same day.

An impressive programme

Just a small excerpt from our components and sub-assemblies range:

- hydraulic pumps and motors
- gear pumps and motors
- hydraulic valves
- cartridge valves
- screw-in valves
- electro-hydraulics
- fan systems
- hydrostatic drives
- hydrostatic compact axes
- hydrostatic compact gears
- power units

And so on and so forth...

These are just some of the products that we can provide you with. We will also configure complete system solutions from them on request.

Our competent team is at your service
