Technical Information (TI)

A TI is comprehensive information for engineering and service personnel to reference.

Data Sheet (DS)

A DS is summarized information and parameters that are unique to a specific model.

PLUS+1® GUIDE User Manual

This user operation manual (OM) details information regarding the PLUS+1® GUIDE tool set that is used to build PLUS+1® applications. This OM covers the following broad topics:

- How to use the GUIDE graphical application development tool to create machine applications
- How to configure module input and output parameters
- How to configure module input and output parameters
- How to download GUIDE applications to target PLUS+1® hardware modules
- How to upload and download tuning parameters
- How to use the PLUS+1® Service Tool

Danfoss product literature is online at: <http://powersolutions.danfoss.com/literature/>

User liability and safety statements

OEM responsibility

The OEM of a machine or vehicle in which Danfoss products are installed has the full responsibility for all consequences that might occur. Danfoss has no responsibility for any consequences, direct or indirect, caused by failures or malfunctions.

- Danfoss has no responsibility for any accidents caused by incorrectly mounted or maintained equipment.
- Danfoss does not assume any responsibility for Danfoss products being incorrectly applied or the system being programmed in a manner that jeopardizes safety.
- All safety critical systems shall include an emergency stop to switch off the main supply voltage for the outputs of the electronic control system. All safety critical components shall be installed in such a way that the main supply voltage can be switched off at any time. The emergency stop must be easily accessible to the operator.

Overview

Features

- External NAV button allows navigation through all DP6XX functions. Mount NAV button so that the driver can navigate securely in all situations during work and travel.
- Built-in real-time clock enables machine use time tracking as well as data logging.
- CAN, RedCAN, RS-232, and USB interfaces as a gateway for updating and diagnosing all machine control systems.
- Powerful 32-bit microprocessor produces smooth, flicker-free movements of gauges and readouts in the display screen.
- Anti-glare display screen and sensor-controlled backlight levels provide superior legibility under all operating conditions, whether freestanding or dash-mounted.
- Video input option allows display of inputs from two standard composite video observation cameras.
- Rugged, shock-resistant construction protects against dust and resists the effects of moisture by fresh water.
- GORE-TEX® membrane vent keeps moisture from fogging its display screen.
- High brightness LED and digital alarm output alert the operator to alarm states under all operating conditions.
- Complete system software updates are possible through the CAN network.
- Environmental and EMC standards are met according to Danfoss standards defined for mobile applications.
- High performance 32 bit microcontroller for real-time screen updates.
- Smooth and flicker-free/accurate movement of virtual gauges and needles.
- Ample onboard flash/RAM memory.
- Data logging capabilities.
- USB port for fast software download and uploads.
- Same outside dimensions for screen variants.
 - Color: advanced TFT 400 x 240 pixels, transreflective, 256 colors
 - Monochrome: LED 320 x 240 pixels, transreflective
- Two mounting options.
 - Flush mount in dashboard
 - Stand alone on post according to VESA standard 75mm x 75mm [2.953 in x 2.953 in]
- Fully integrated connectors and silicone keypad provide water and dust protection from all sides.
- Designed to withstand high-levels of shock/vibration.
- Extremely wide storage and operating temperature range.
- Keypad with 14 buttons (8 soft-keys + 6 buttons for navigation).
- All buttons have green backlight design for low light and night use.
- Ultra-bright red/amber/green alarm LED.
- 2 shielded Binder connectors for USB, RS-232 and camera inputs.
- 2 CAN ports, one fully compatible to RedCAN™, for enhanced safety and reliability in mobile control systems.
- Integrated light sensor for automatic backlight adjustment.
- 2 DEUTSCH DTM connectors.
- Works with either 12 Vdc or 24 Vdc power supplies.

Input/outputs

Inputs

This series of displays support the following pin types:

- Digital or Analog (DIN/AIN)
- Multifunction (DIN/AIN/FreqIN, Rheo, 4–20 mA)
- Analog or Temperature or Rheostat (AIN/Temp/Rheo)
- Fixed Range Analog or CAN shield (AIN/CAN shield)

This series of displays have input pins that support multiple functions. Pins that support multiple input types are user-configurable using PLUS+1® GUIDE software.

Digital/analog

To power the camera up, it is recommended to use the display as power supply. If using a different power supply, it should meet the specification of the camera in regards of the voltage type and range, the current and voltage amount it can supply to its load, stability of the output voltage and current under varying line and load conditions, operating/storage temperature ranges.

[The use of a different power supply for the camera can create "noise" on the signal line which will affect its functionality.](#)

Product ratings

General technical specifications

Operating voltage range	9 to 70 VDC
Power consumption	15 W max
Digital Inputs (3)	U _{in} < 1.5 VDC logical low U _{in} > 1.5 VDC logical high 2 inputs designed for 90° A/B encoder signals, menu NAV button
Option: Video inputs (2)	Standard composite PAL video signal input.
Output for buzzer (1)	low side, max 0.5 A
Camera power output	12V, Max. output current: 400 mA
Camera video input	Composite video, 1V peak-peak
CAN interface for external NAV	2 CAN ports according to CAN specification 2.0 B (active). 250 kbit standard setting (recommended) Baud rates: 111kbit, 250 kbit, 500kbit, 1 Mbit 2 pins for CAN shield according to J1939. One CAN port, fully compatible to Danfoss RedCAN standard.
Encoder inputs	Logical inputs: 5V Logical 0: U _{in} < 1.5V Logical 1: U _{in} > 3.5V Input impedance: 100kΩ Max. frequency input: 100 Hz
Encoder supply	5V, Max. output current 400 mA
Communication	USB RS-232: Baud rates: 1200, 2400, 9600, 19200, 28800, 38400, 115200 baud. No handshake available.
Memory	8MB RAM 8K FRAM parameter memory (256 byte available for application data storage).
Electrical connections	1 Deutsch DTM 12-pin connector, Code C1 1 Deutsch DTM 6-pin connector, Code C2 1 Binder 7-pin connector for USB/RS-232, Code C3 1 Binder 5-pin connector for video-signals, Code C4
Operating temperature	DP600; DP610: -30 °C — +70°C [-22°F — +158° F] DP620: -20 °C — +70°C [-4°F — +158°F]
Storage temperature	DP600; DP610: -40 °C — +85°C [-40°F — +185° F] DP620: -30 °C — +80°C [-22°F — +176°F]
Moisture Ingression	IP67, in accordance with SS-EN 60 529 Unused connections must have sealing plugs for IP rating to be valid.
Vibration	IEC 60068-2-64-Fh with severity according to IEC TR 60721-4-5 environmental class 5M3
Shock	IEC 60068-2-27-Ea with severity according to IEC TR 60721-4-5 environmental class 5M3; free fall according to IEC 68-2-32Ed
Electrical	Automotive transients ISO 7637/1-2 Automotive transients ISO 7637/3
EMC emission	EN 61000-6-3
EMC immunity	EN 61000-6-2

Product ratings

Membrane switches	14 keys 1 million cycles endurance Pressure force: 300 gram (+/- 30 grams)
Real time clock	Date & Time Backup time: minimum 1 month Accuracy: 1 sec/24 hours
Programmable ambient light sensor	OSRAM SFH3410
Faceplate	Ultra bright faceplate-integrated red LED alarm

Supply voltage/maximum current ratings

DP6XX graphical displays are designed to operate with a nominal 9 to 63 Vdc power supply with reverse polarity protection.

Supply voltage

Description	Unit	Minimum	Maximum	Comment
DC supply voltage	Volt	9	70	With reverse polarity protection
DC supply current (circuit board only)	mA	2.5		UBat = 8V

Testing criteria

Climatic

Condition	Rating
Cold/heat storage and operation	IEC 60068-2-1, IEC 60068-2-2
Fogging	IEC 60068
Temperature change	IEC 60068-2-30
Moisture ingress	IEC 60529
Sunlight visibility	IEC 68-2-5

Chemical

Condition	Rating
Chemical resistance	ISO 16750-5

Mechanical

Condition	Rating
Vibration, resonance	IEC 60068-2-6
Vibration, operation	IEC 60068-2-64
Bump	IEC 60068-2-29
Shock	IEC 60068-2-27
Free fall	IEC 60068-2-32

Maintenance guidelines

Opening the display's housing voids the factory warranty.

LCD module

Caution

Prolonged exposure to direct intense sunlight can cause premature failure of the LCD module. This risk can be reduced by providing shading or mounting the display at an incline rather than the horizontal.

Caution

The protective glass will break if hit with a hard or heavy object. If the protective glass is broken, remove the display from your machine then return the display to Danfoss to be serviced.

Clean the display's housing and protective glass with a clean, soft, damp cloth, or mild dishwashing detergent because abrasive pads or solvents, including alcohol, benzene, and paint thinner can cause scratching and discoloration.

Installation

Dimensions

DP600, DP610, DP620 Series Displays dimensions in millimeter [inches]

kwa1463500663772

Installation

Two mounting options

Flush mounted

Use the DP600 panel mounting spring clip to flush-mount display into a dashboard.

Panel cutout (mm [in]) and panel mounting spring clip

P200164

1. 4 x hole for M4 screw
2. Panel cutout
3. Display assembly
4. Snap in
5. 4 x M4 screw
6. Spring clip
7. Panel

Installation

Stand-alone on post

Mount according to VESA (Video Electronics Standards Association) Mount Standards The VESA hole pattern for this display is: 75.00 mm x 75.00 mm (02.95 in x 02.95 in).

Post mounting option (mm [in])

P200161

1. 4 x hole for M4 screw x 0.7 mm (0.03 in) x 11 mm (0.43 in) maximum depth

Disconnect your machine's battery power before connecting power and signal cables to the display.

Installation

Machine wiring guidelines

- Protect wires from mechanical abuse, run wires in flexible metal or plastic conduits.
- Use 85° C (185° F) wire with abrasion resistant insulation and 105° C (221° F) wire should be considered near hot surfaces.
- Use a wire size that is appropriate for the module connector.
- Separate high current wires such as solenoids, lights, alternators or fuel pumps from sensor and other noise-sensitive input wires.
- Run wires along the inside of, or close to, metal machine surfaces where possible, this simulates a shield which will minimize the effects of EMI/RFI radiation.
- Do not run wires near sharp metal corners, consider running wires through a grommet when rounding a corner.
- Do not run wires near hot machine members.
- Provide strain relief for all wires.
- Avoid running wires near moving or vibrating components.
- Avoid long, unsupported wire spans.
- Ground electronic modules to a dedicated conductor of sufficient size that is connected to the battery (-).
- Power the sensors and valve drive circuits by their dedicated wired power sources and ground returns.
- Twist sensor lines about one turn every 10 cm (4 in).
- Use wire harness anchors that will allow wires to float with respect to the machine rather than rigid anchors.

 **Caution**

Unused pins on mating connectors may cause intermittent product performance or premature failure. Plug all pins on mating connectors.

 **Warning**

Unintended movement of the machine or mechanism may cause injury to the technician or bystanders. Improperly protected power input lines against over current conditions may cause damage to the hardware. Properly protect all power input lines against over-current conditions.

Machine welding guidelines

 **Warning**

High voltage from power and signal cables may cause fire or electrical shock, and cause an explosion if flammable gasses or chemicals are present. Disconnect all power and signal cables connected to the display before performing any electrical welding on a machine.

The following is recommended when welding on a machine equipped with electronic components:

- Turn the engine off.
- Remove electronic components from the machine before any arc welding.
- Disconnect the negative battery cable from the battery.
- Do not use electrical components to ground the welder.
- Clamp the ground cable for the welder to the component that will be welded as close as possible to the weld.

Products we offer:

- Bent Axis Motors
- Closed Circuit Axial Piston Pumps and Motors
- Displays
- Electrohydraulic Power Steering
- Electrohydraulics
- Hydraulic Power Steering
- Integrated Systems
- Joysticks and Control Handles
- Microcontrollers and Software
- Open Circuit Axial Piston Pumps
- Orbital Motors

Danfoss Power Solutions is a global manufacturer and supplier of high-quality hydraulic and electronic components. We specialize in providing state-of-the-art technology and solutions that excel in the harsh operating conditions of the mobile off-highway market. Building on our extensive applications expertise, we work closely with our customers to ensure exceptional performance for a broad range of off-highway vehicles.

We help OEMs around the world speed up system development, reduce costs and bring vehicles to market faster.

Danfoss – Your Strongest Partner in Mobile Hydraulics.

Go to www.powersolutions.danfoss.com for further product information.

Wherever off-highway vehicles are at work, so is Danfoss. We offer expert worldwide support for our customers, ensuring the best possible solutions for outstanding performance. And with an extensive network of Global Service Partners, we also provide comprehensive global service for all of our components.

Please contact the Danfoss Power Solution representative nearest you.
